

WADE BAKER, M.S. - FAA DRONE PILOT CERTIFIED

Vector Scientific, Inc. would like to congratulate Wade Baker, M.S. who recently obtained his Remote Pilot Certificate from the Federal Aviation Administration. Mr. Baker successfully demonstrated that he understands the regulations, operating requirements, and procedures for safely flying a small unmanned aircraft (sUAS) required by 14 CFR Part 107 for commercial drone use.

In his forensic work at Vector Scientific, Wade's utilization of drone technology enables him to efficiently capture both still and video aerial photography used to generate topographical surveys, high resolution orthomosaics, and high-quality scaled images used for VSI's accident reconstruction services.

Additionally, drone footage can be combined with laser scan data to create scale replica 3D models of roadways, buildings and complex accident scenes.

Please contact Wade to discuss how Vector Scientific can help you analyze your case.
